Excel IF Function – Interview Questions & Answers

Q1. What is the basic syntax of the IF function?

Answer:

=IF(condition, value_if_true, value_if_false)

Easy Meaning

IF checks a condition.

- **If condition is TRUE → returns first result**
- **If condition is FALSE → returns second result**

Example

=IF(A1>=35,"Pass","Fail")

If marks are 35 or more → Pass

Otherwise → Fail

Q2. What happens if value_if_false is not written and the condition is FALSE?

Answer:

Excel returns FALSE.

Example

=IF(A1>=35,"Pass")

If A1 = 20

Result:

FALSE

Q3. Which function is used when all conditions must be TRUE?

Answer:

AND Function

Example

=IF(AND(A1>=35,B1>=35),"Pass","Fail")

Both conditions must be true.

Easy Meaning

AND = All conditions must be TRUE

Q4. How should text be written in an IF formula?

Answer:

Inside Double Quotes (" ")

Example

=IF(A1>=35,"Pass","Fail")

Correct ☒

Q5. Which function is used when any one condition can be TRUE?

Answer:

OR Function

Example

=IF(OR(A1>60,B1="Certificate"),"Eligible","Not Eligible")

Easy Meaning

OR = At least one condition must be TRUE

Important Interview Questions

Q6. What is the IF function?

Answer:

The IF function checks a condition and returns one result if TRUE and another result if FALSE.

Q7. What is the purpose of IF function?

Answer:

To make decisions in Excel based on conditions.

Q8. What is the difference between AND and OR?

AND

OR

All conditions must be TRUE

Any one condition can be TRUE

Strict condition

Flexible condition

Q9. Give an example of IF with AND.

Answer:

=IF(AND(A1>=35,B1>=35),"Pass","Fail")

Both subjects must be passed.

Q10. Give an example of IF with OR.

Answer:

=IF(OR(A1>60,B1="Certificate"),"Eligible","Not Eligible")

Any one condition is enough.

Quick Revision

Function	Meaning
IF	Checks a condition
AND	All conditions must be TRUE
OR	Any one condition must be TRUE
"Text"	Must be written in double quotes
Missing value_if_false	Returns FALSE

Easy Formula Memory Trick

=IF(Test, True Result, False Result)

IF = Condition → Yes Result → No Result
