Microsoft Excel Beginners To Advance Exams

3-Essential Formulas-Exam

Q1. Which key should you press after typing in a cell to exit Edit Mode?

Answer:

☒ Enter

Easy Meaning:

Press Enter to save the data and move to the next cell.

Q2. What shortcut key is used to Undo the last action?

Answer:

☒ Ctrl + Z

Easy Meaning:

Undo means cancel the last action.

Example:

If you accidentally delete data → Press Ctrl + Z.

Q3. While dragging the Fill Handle, which key helps Excel create a series instead of copying the same value?

Answer:

☒ Ctrl

Easy Meaning:

Holding Ctrl while dragging Fill Handle creates a series.

Example:

Without Ctrl:

1
1
1
1

With Ctrl:

1
2
3
4

Q4. Where should you double-click to automatically adjust column width?

Answer:

☒ Right Border of the Column Header

Easy Meaning:

Double-click between two column names to AutoFit the column width.

Example:

A | B

Double-click between A and B.

Q5. Which Excel function is used to add numbers from a selected range?

Answer:

☒ =SUM()

Example:

=SUM(A1:A5)

Easy Meaning:

SUM adds all numbers in a range.
