

POWER BI 30 DAYS COURESE

Day 9 - Formatting of Column and Bar Chart 2

1. General Settings

General settings control the overall appearance and position of the visual.

Options:

- X Position
- Y Position
- Width
- Height

Use:

Move and resize charts easily.

Example:

Increase Width to make the chart larger.

2. Properties

Properties control visual behavior.

Use:

- Rename visual
 - Manage accessibility settings
-

3. Title Formatting

The title describes the chart.

Options:

- Title On/Off

- Font Size
- Font Color
- Alignment
- Background Color

Example:

Sales by Region

4. Visual Border

Adds a border around the chart.

Use:

Makes visuals look organized.

Example:

5. Background

Changes chart background color.

Example:

- White
- Light Blue
- Gray

Use:

Improves dashboard design.

6. Shadow

Adds a shadow effect behind visuals.

Use:

Makes charts look professional.

7. Visual Header

Icons displayed on the top-right corner of a visual.

Examples:

- **Focus Mode**
- **Export Data**
- **More Options (...)**

Use:

Provides quick actions.

8. Tooltip

Shows extra information when the user hovers over a chart.

Example:

Hover on a bar:

**Region = East
Sales = 50,000
Profit = 8,000**

Use:

Displays additional details.

9. X-Axis Formatting

Controls the horizontal axis.

Options:

- **Axis Title**
- **Font Size**

- Color
- Gridlines

Example:

East West North South

10. Y-Axis Formatting

Controls the vertical axis.

Options:

- Axis Title
- Display Units
- Font Size
- Color

Example:

0
10K
20K
30K

11. Data Colors

Changes column or bar colors.

Example:

- Blue
- Green
- Orange

Use:

Highlight important data.

12. Data Labels

Displays values directly on bars or columns.

Example:

East = 50K
West = 70K

Use:

Users can read values instantly.

13. Legend Formatting

Controls the appearance of the legend.

Options:

- Position
- Font Size
- Color
- Title

Example:

■ Furniture
■ Technology
■ Office Supplies

14. Gridlines

Reference lines inside the chart.

Use:

Help users estimate values accurately.

15. Zoom Slider

Allows users to zoom into large datasets.

Example:

View only specific months from a yearly sales chart.

Difference Between Part 1 and Part 2

Part 1	Part 2
Basic Formatting	Advanced Formatting
Title	Tooltip
Legend	Visual Header
Data Labels	General Settings
Colors	Zoom Slider
Axis	Borders & Shadow

Interview Questions & Answers

Q1. What is Advanced Chart Formatting?

Answer:

Advanced chart formatting is used to make charts look better and easier to use by adding options like tooltips, borders, shadows, and visual headers.

Q2. What is a Tooltip?

Answer:

A Tooltip shows extra information when you move the mouse over a chart.

Example:

Hover on a sales bar → Sales = 50,000

Q3. What is a Visual Header?

Answer:

A Visual Header is the menu at the top of a chart that contains options like:

- Focus Mode
- Export Data

- More Options
-

Q4. Why do we use Data Labels?

Answer:

Data Labels show values directly on the chart so users can read them easily.

Q5. What is the purpose of Gridlines?

Answer:

Gridlines help users read and compare chart values more accurately.

Q6. What is the use of Shadow?

Answer:

Shadow makes a chart look attractive and professional.

Q7. What is the purpose of Zoom Slider?

Answer:

The Zoom Slider helps users zoom in and view a specific part of the data.

Q8. What is the difference between Background and Border?

Background

Border

Fills the chart with color

Creates an outline around the chart

Easy Example:

Background = Paint on the wall 

Border = Frame around a photo 

Q9. What is the purpose of X-Axis and Y-Axis formatting?

Answer:

It improves readability by changing axis titles, colors, font sizes, and display settings.

Q10. Why is formatting important in dashboards?

Answer:

Formatting makes dashboards attractive, professional, and easy to understand.

Easy Interview Answer (Most Important)

Formatting of Column and Bar Charts is used to make charts look better, easier to read, and more user-friendly by changing titles, colors, labels, tooltips, borders, and other visual settings. 🚀
