

POWER BI 30 DAYS COURESE

Day 10 - Formatting of Column and Bar Chart 3

What is Advanced Formatting Part 3?

Part 3 focuses on making charts more interactive, professional, and easier to analyze.

1. Drill Down

Meaning

Drill Down allows users to see detailed data from summarized data.

Example

Country

State

City

Use

Analyze data at different levels.

Easy Definition

Drill Down is used to move from summary data to detailed data.

2. Drill Up

Meaning

Drill Up moves back from detailed data to summarized data.

Example

City

State

Country

Easy Definition

Drill Up is used to return from detailed data to summary data.

3. Sort Visual

Meaning

Used to arrange chart data.

Types

- Ascending
- Descending

Example

Sales:

100
300
500

or

500
300
100

Easy Definition

Sort arranges data in a specific order.

4. Focus Mode

Meaning

Enlarges a chart and shows it in full screen.

Use

Analyze charts more clearly.

Easy Definition

Focus Mode displays a visual in a larger view.

5. Export Data

Meaning

Exports chart data to Excel or CSV.

Use

Share data outside Power BI.

Easy Definition

Export Data saves visual data into Excel or CSV files.

6. Copy Visual

Meaning

Creates a duplicate visual.

Use

Reuse existing charts quickly.

7. Rename Visual

Meaning

Changes the visual name.

Example

Sales Chart

to

Monthly Sales Chart

8. Lock Object

Meaning

Prevents accidental movement of visuals.

Use

Maintain dashboard layout.

9. Group Visuals

Meaning

Combines multiple visuals into one group.

Example

- Chart
- Text Box
- Image

Grouped together.

Use

Move multiple visuals at the same time.

10. Snap to Grid

Meaning

Snap to Grid automatically aligns charts and visuals neatly on the report page, making dashboards organized and professional.

Use

Create neat dashboards.

Interview Questions

Q1. What is Drill Down?

Answer:

Drill Down allows users to move from summarized data to detailed data.

Q2. What is Drill Up?

Answer:

Drill Up allows users to return from detailed data to summarized data.

Q3. Why do we use Drill Down?

Answer:
To analyze data at different levels of detail.

Q4. What is Focus Mode?

Answer:
Focus Mode enlarges a visual for better analysis.

Q5. What is Export Data?

Answer:
Export Data saves visual data into Excel or CSV files.

Q6. What is Sort Visual?

Answer:
Sort Visual arranges data in ascending or descending order.

Q7. What is the purpose of Lock Object?

Answer:
Lock Object prevents visuals from being moved accidentally.

Q8. What is Group Visuals?

Answer:
Group Visuals combines multiple visuals into one group so they can be managed together.

Q9. What is Snap to Grid?

Answer:
Snap to Grid automatically aligns visuals neatly on the report page.

Q10. Why is advanced formatting important?

Answer:

Advanced formatting improves dashboard usability, organization, and user experience.

Easy Interview Answer

Advanced Formatting Part 3 helps make charts more interactive and user-friendly by using features like Drill Down, Drill Up, Focus Mode, Export Data, Sorting, Grouping, and Alignment. 🚀
